

It takes just a few steps to create an individual offer:

1

Login / Registration

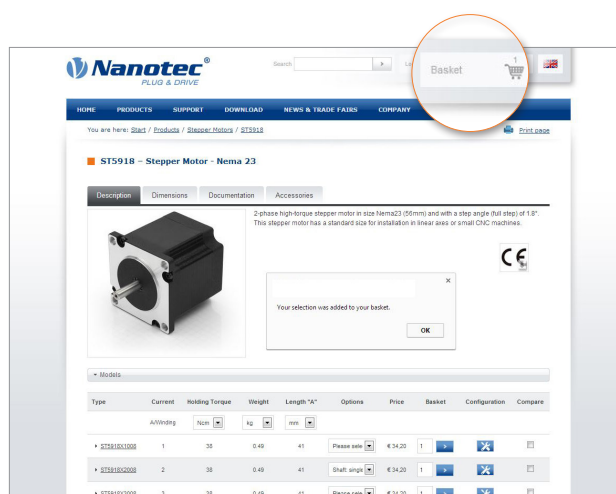

To open the „Request offer“ function, log in and register as a new user. If you are a **member of a university**, you can now mark the corresponding field in the form.

2

Selecting items

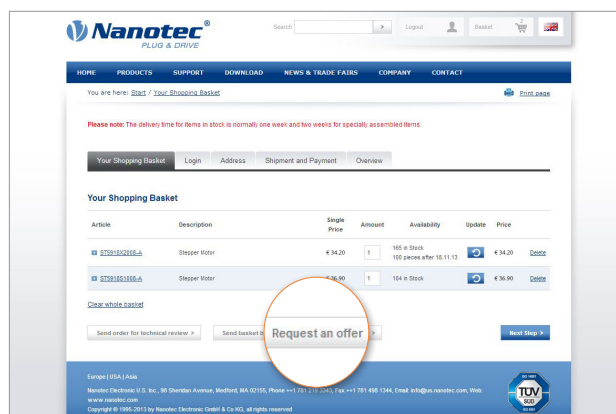

Find the items you require and place them in the shopping cart. You can also add **configured items** or standard **shaft modifications**. Then click on the shopping cart button in the top right corner.

3

Requesting an offer

In the shopping cart, you can check the items and their **availability** and adjust their quantity. When your entries are final, click on the „Request offer“ button.

4

Sending the offer

The individual offer along with the **availability** of the items you require will be sent to the e-mail address you indicated. As a university member you will receive the **university discount**. Use the offer number when placing your order.
